

A CAPABILITY FORMATION EXPERIENCE

# Decide Whether to Stay or Leave Your Job

A Live Career Growth Assessment

---

[IMAGE]

## The Capability Position Read

*Read the Position Before You Make the Move*

**FREE FLAGSHIP · 60 MINUTES**

**Temidayo Afonja**

Founder, The Density Group  
Author, The Capability Audit

# The question underneath the question

*A fair question, and a reading that sits upstream of it.*

## WHAT YOU CAME IN ASKING

“Should I stay in this role,  
or should I go?”

## WHAT YOU NEED TO READ FIRST

“Is this position still forming me,  
and does what it built travel?”

The first question is yours alone. The second sits upstream of it, and this session can read it more rigorously.

# What this read will and will not do

This read will not tell you to stay or leave.

**IT WILL**

Give you a defensible reading of your current position and one category of move your evidence supports testing.

**IT WILL NOT**

Predict layoffs, diagnose your employer, or make an employment decision for you.

**YOUR SCORES**

Stay private. Nothing is submitted, collected or shared at any point.

**THE RECORDING**

The teaching runs to minute 50 and is recorded. The last ten minutes are live questions and are not recorded.

*This is not legal, medical, financial, immigration or mental-health advice.*

## DEFINITION ONE

# Density

*Learning velocity. Whether this environment is still forming you.*

Density is whether the environment is still building capability in you. It is a property of your conditions, not your effort. A role can be exhausting and form nothing.

**Density is not motivation, hours, pressure or effort. It is whether the work is still teaching you something you could not do ninety days ago.**

*Six statements measure it. You will score them in a moment.*

## DEFINITION TWO

# Optionality

*Market portability. Whether what you built travels.*

Optionality is whether the capability you are building would be recognised and valued somewhere other than here. It is about translation and exposure as much as ability.

**A low Optionality score may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on ability or worth.**

*Six statements measure it. Same scale, same window.*

## Your initial read: statements 1 to 3

*Density. Live, silent. 1 strongly disagree to 5 strongly agree.*

**1** In the last ninety days I have been handed a problem I did not already know how to solve.

1 2 3 4 5

**2** I work close enough to people who are better than me that I can watch how they think.

1 2 3 4 5

**3** My work is reviewed by someone who can tell the difference between good and adequate, and who says so directly.

1 2 3 4 5

*No evidence line yet — that is deliberate.*

## Your initial read: statements 4 to 6

*Density, continued. Same window, same instruction.*

4

The feedback I receive changes what I do next, not just how I feel.

1 2 3 4 5

5

I regularly operate at the edge of my competence rather than the comfortable center of it.

1 2 3 4 5

6

Looking back six months, the work I do now would have been genuinely hard for me then.

1 2 3 4 5

*No evidence line yet — that is deliberate.*

## INITIAL READ

# Your initial Density reading

*Add statements 1 to 6.*

### INITIAL DENSITY TOTAL

\_\_\_\_\_ / 30

19 to 30 is high

6 to 18 is low

17 to 21 is the boundary band

**Hold the number. Do not share it.**

*A total inside 17 to 21 sits on the boundary. It does not resolve to high or low — you will read both neighbouring states rather than pick one.*

## Your initial read: statements 7 to 9

*Optionality. Same scale, same window.*

**7** The capability I am building would be valued by an employer in a different industry. 1 2 3 4 5

**8** I can describe what I do in terms of outcomes, not just my company's internal language. 1 2 3 4 5

**9** If my role disappeared tomorrow, the capability I built would still be mine to carry. 1 2 3 4 5

*No evidence line yet — that is deliberate.*

## Your initial read: statements 10 to 12

*Optionality, continued. Last block of the first pass.*

- |           |                                                                                                               |           |
|-----------|---------------------------------------------------------------------------------------------------------------|-----------|
| <b>10</b> | People with the power to hire or advance me, inside or outside my company, can already see what I am good at. | 1 2 3 4 5 |
| <b>11</b> | What I am learning is a transferable capability rather than a company-specific procedure.                     | 1 2 3 4 5 |
| <b>12</b> | I could rebuild a strong position somewhere else within a year.                                               | 1 2 3 4 5 |

*No evidence line yet — that is deliberate.*

## INITIAL READ

# Your initial Optionality reading

*Add statements 7 to 12.*

### INITIAL OPTIONABILITY TOTAL

\_\_\_\_\_ / 30

19 to 30 is high

6 to 18 is low

17 to 21 is the boundary band

**Hold the number. Do not share it.**

*A total inside 17 to 21 sits on the boundary. It does not resolve to high or low — you will read both neighbouring states rather than pick one.*

# The four states

*Density crossed with Optionality. Your state reveals a form of exposure your job title cannot.*

OPTIONALITY: LOW AT LEFT → HIGH AT RIGHT

# Place yourself. Privately, and provisionally.

*Cross your two numbers, then rate your confidence in the placement from 1 to 5.*

## 1 Cross Density and Optionality

Two totals, one square. If either total sits inside 17 to 21, mark it boundary instead of picking a square.

## 2 Rate your confidence from 1 to 5

Write the number privately. You will compare it against your confidence after the evidence pass.

## 3 Hold it lightly

This is a first read, not a finding. State is not identity — it reads conditions in a ninety-day window, and it moves.

**No one is asked to share a square. Nothing is collected.**

# The evidence protocol

*This is what your second reading has to survive.*

Every corrected score requires an evidence line from the last ninety days. Every score, in both directions.

**A 4 OR 5**

At least one clear positive instance from within the window.

**A 3**

The mixed or inconsistent pattern. A 3 is a reading, not an absence of one.

**A 1 OR 2**

What repeatedly happened instead, a counterexample, or no qualifying instance in the window.

**A ?**

**Cannot support it either way? Write your most defensible number and add one question mark: 3?, 4?, 2?**

**A 3 means mixed. A question mark means unsupported.**

# Three ways a self-score goes wrong

*Run all three against your first numbers before you rescore.*

## 1. SCORING THE INTENDED LIFE

*"My rotation was approved last month. Statement 1 gets a 4."*

**The window is the last ninety days of work that happened — not work that was approved, promised or planned.**

## 2. CONFUSING VALUED WITH FORMED

*"Three VPs ask for my read before anything ships. Statement 3 gets a 5."*

**Being relied on is real. It is not the same as being developed.**

## 3. READING LOW OPTIONALITY AS A VERDICT

*"Statement 10 is a 2 because I am not senior enough."*

**A low Optionality score may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on ability or worth.**

*Three is the set. Run them, then rescore.*

# Score all twelve again

*Evidence in both directions. Do not change your first number.*

## THE PROTOCOL, IN SHORT

**4 or 5**      one clear positive instance

**1 or 2**      what happened instead, or no qualifying instance

**3**      the mixed or inconsistent pattern

**?**      most defensible number, marked once: 3?, 4?, 2?

**Density 1 • 2 • 3 • 4 • 5 • 6**

**Optionality 7 • 8 • 9 • 10 • 11 • 12**

Write the corrected number and a short evidence phrase under it. Your first number stays where it is. Phrases, not essays — twelve minutes for twelve statements.

**Workbook pages 5 and 6.**

# Re-total before you place again

*New numbers. A fresh placement, not a review of the first one.*

DENSITY, CORRECTED

\_\_\_\_\_ / 30

OPTIONALITY, CORRECTED

\_\_\_\_\_ / 30

**19 to 30 high · 6 to 18 low · 17 to 21 is the boundary band, and it overrides both**

Total the axis using the numbers exactly as you wrote them. A question-marked score counts as its number. Rate your confidence in the corrected placement from 1 to 5.

# When the evidence remains uncertain

*The neighbouring-score sensitivity check. An operational convention, not a statistical confidence interval.*

NONE

**No unsupported-item sensitivity range is required.**

Use the corrected total normally, subject to the boundary band.

1 OR 2

## PROVISIONAL — RUN THE NEIGHBOURING-SCORE SENSITIVITY CHECK

- Total the axis using your numbers exactly as written.
- Total it again with every marked item one point lower, then again one point higher.
- Bounded inside the 1 to 5 scale — a 1? is never tested at 0, a 5? never at 6.
- If the sensitivity range includes any total from 17 to 21, do not force a state. Hold the axis as boundary.

3+

**INCOMPLETE — do not place on that axis today. Incomplete is a legitimate reading, not a failure.**

**ONE axis in the 17–21 band: read the two adjacent states the OTHER axis selects.**

**BOTH axes in the band: record Boundary and assign no single state.**

# Your corrected position

*Privately placed, provisionally held.*

## 1 Place your corrected square

Or mark boundary, or mark the axis incomplete. All three are legitimate readings.

## 2 Rate your confidence from 1 to 5

Compare it with the confidence number from your first placement on workbook page 3. The comparison is private.

## 3 Keep both readings visible

The first number and the corrected number sit side by side. The distance between them is the finding.

A position you can defend with evidence is worth more than a position you feel confident about.

# What each state costs

*All four, briefly. The immediate cost only.*

## DEPTH TRAP

Value is deep but context-bound.

## COMPOUNDING

A strong current position still requires renewal.

## STAGNANT

Neither axis is accruing.

## FRAGILE

What travels today is no longer being renewed.

*This is the short reading. The fuller cost of your own square, including the hidden cost, the cost of waiting, and the false reassurance that keeps you there, belongs in deeper follow-on work.*

# Seven categories of move

*Direction, not a plan. Your evidence helps you choose which category to test.*

|   |                                     |                                                                                 |
|---|-------------------------------------|---------------------------------------------------------------------------------|
| 1 | <b>Remain and deepen</b>            | The formation conditions are real and worth protecting.                         |
| 2 | <b>Translate what is built</b>      | The capability exists. The language for it does not.                            |
| 3 | <b>Widen exposure</b>               | The work is good and the wrong people have seen it.                             |
| 4 | <b>Test portability</b>             | Find out what travels before you need it to.                                    |
| 5 | <b>Repair formation conditions</b>  | Change the work, not the employer, first.                                       |
| 6 | <b>Prepare for exit</b>             | Your evidence gives you reason to prepare in case the conditions do not repair. |
| 7 | <b>Seek an external perspective</b> | High stakes, incomplete evidence, or a boundary position.                       |

**No square prescribes a category. Your evidence and constraints still apply.**

# The Next-Move Note

*Three lines. Yours, private, and enough to act on.*

## MY CURRENT READ

My position appears to be:

*State / boundary / incomplete*

-----

## WHAT I NEED TO TEST

The category of move my evidence supports testing is:

*One of the seven categories.*

-----

## WHAT HAPPENS NEXT

One action, conversation, or piece of evidence I will pursue next is:

*One thing. Something you could begin this month.*

-----

**This is a note, not a decision. It records what your evidence supports testing next.**

# Choose How You Want to Continue the Read

*Your read is complete. What you need next depends on what is still unresolved.*

1

## **I have enough for now.**

Take your Next-Move Note and act on it.

Nothing further is required. The session was built to be complete on its own.

2

## **I want to keep working privately.**

Continue with the Capability Formation Field Kit.

You understand your reading and want a structured system you can return to on your own.

3

## **I can read the position, but the decision is still difficult.**

Bring the reading into a Private Capability Position Read.

The evidence is clearer, but your context, constraints or stakes still need working through.

**Different unresolved needs require different levels of support.**

# Continue privately, or apply the reading to the decision

*This session is complete on its own. Neither route is required.*

## SELF-GUIDED

### Capability Formation Field Kit

Private, self-guided continuation of the same evidence discipline.

- Fuller state-cost work
- A repeatable private evidence process
- A structured rescore
- A system you own and return to

*The shipped kit*

## HIGH-TOUCH

### Private Capability Position Read

One-to-one application of your read to the decision actually in front of you.

---

**“We read them together.”**

*The Field Kit helps you keep reading the position as conditions change. The Private Read helps you apply the reading to the decision.*

BEFORE YOU GO

# You have read your position. The move is the next conversation.

---

Put a rescore date ninety days out before you close your notes. When your reading changes, notice what changed. Share it only if you choose.

Capability Formation · Temidayo Afonja · The Density Group

# Questions & Applications

*Ten minutes. The recording has stopped.*

“I can help you clarify what your evidence supports. I cannot make the employment decision for you.”

## WELCOME

Statement interpretation · the evidence protocol ·  
boundary and incomplete readings · move-category  
distinctions · what to investigate next

## OUTSIDE THE BOUNDARY

Telling someone to stay or leave · predicting layoffs ·  
legal, medical, financial, immigration or tax questions ·  
diagnosing an employer · asking for scores, states or  
employer names

**Close at 60:00.**

# Position Exposure Signals

*Questions to investigate, not predictions.*

## **Your current role**

Is the mandate being absorbed, narrowed, duplicated or repeatedly redefined?

## **A role you are considering**

Does the position exist because of a strategy, or because of one sponsor?

## **Either**

Who outside your manager would notice if the function disappeared?

# AI and Compounding

*An application of the two axes. Not a technology session.*

## **The reading does not change**

Where AI makes routine output easier to reproduce, your position depends more heavily on judgment, learning velocity, and capability that travels across unfamiliar problems.

## **Density and Optionality do not become less important**

They become more consequential.

## **What this is not**

Not a prediction about jobs, tools or timelines. No tool names.

# What translation actually means

*An application of the second move category.*

## **Legibility is not bragging**

It is evidence translated into language another context can understand.

## **The pattern**

Name the problem, the constraint, what you did, and what changed — without internal vocabulary.

## **Why it matters**

A low Optionality score may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on ability or worth.

# Promotion and formation

*The same misreading, in the place it is hardest to see.*

## The tension

A promotion can increase responsibility, visibility and dependence while reducing formation.

## The pattern

A high performer moves into approvals, representation and familiar judgment — more scope, fewer unfamiliar problems.

## The test

What capability do you have now that you did not have before your responsibilities increased?

INSTITUTIONAL DELIVERY CLOSE · OPTIONAL

What has the journey built in you?

What remains useful when the context changes?

What can you do somewhere else?

---

Capability Formation · Temidayo Afonja · The Density Group

# What moved when you tested your first read

*One anonymous response. No score, state, employer, or identifying information is requested.*

## After testing your first read against evidence, which is closest?

- My totals moved meaningfully
- My provisional position moved
- My position stayed similar, but I trust the reading more
- My evidence is still incomplete

*Every one of these is a legitimate outcome. Incomplete evidence is information, not failure.*

A CAPABILITY FORMATION EXPERIENCE

# Decide Whether to Stay or Leave Your Job

A Live Career Growth Assessment · The Capability Position Read

---

Wednesday, September 16, 2026

6:00–7:00 PM Central Time · Free · 60 minutes · We begin shortly

*Have the workbook open. Nothing is submitted or collected at any point.*
