

Start Here

Welcome to Keep the Proof.

Sixty minutes is what the setup takes with focused time. You can also work through it across several shorter sittings. Each step stands on its own, so you can stop after any step and pick up where you left off.

In the next 60 minutes, you will turn scattered memories of your work into a private career evidence system you can return to before you need a resume, interview story, promotion case, or career move.

Your two tools

1. The 60-Minute Career Evidence System

Begin with the main handbook. It will guide you through choosing meaningful work, identifying what changed because of your contribution, separating evidence from memory, and translating internal work into language that can travel.

2. The Career Evidence Ledger

Use the ledger after completing the handbook. It is your reusable place to capture new evidence, complete monthly and quarterly reviews, and keep your proof current over time.

Recommended order

1. Download both PDFs to your computer.
2. Print the pages you need, or copy the prompts into any notebook or document you control.
3. Save a separate working copy before you begin.
4. Complete the 60-Minute Career Evidence System first.
5. Continue using the Career Evidence Ledger monthly and quarterly.

Already lost access to your work systems? Begin with the Starting Late module.

Applying for a specific role? Finish with Match Your Proof to a Role.

Keep your evidence safe

Keep this system private. Do not enter confidential employee information, protected customer information, proprietary company data, passwords, or sensitive business records.

Describe the work and its outcome without including information you are not permitted to retain.

You should leave the first hour with at least one completed Career Evidence Entry and a repeatable way to keep the proof of what your work has built.
