TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

HOLDING SLIDE. 0:00–0:45. Segment 0–8. Hold while people arrive. Do not open with the framework. Open with the room you were in. The eighteen years and the programme figures belong in the spoken introduction only, framed as where the vantage comes from. They are never proof that a Capability Formation score moves. PRE-SESSION INSTRUMENT VERSION CHECK: confirm before the room opens that the deck, the workbook and the Field Kit all read Capability Formation Instrument Version 1.1. If any asset reads a different version, stop and reconcile before delivery. Data from different versions does not merge. (The opening-story script carries its own document version number; that is not an instrument version and does not need to match.) Ask the room as people join: who has already taken the Diagnostic? Those people rescore against the evidence protocol rather than recalling their previous number. RECORDING BOUNDARY: if recording, capture teaching segments only. Live scoring, participant discussion, voluntary reads and working time are never recorded. State this out loud before you start. Learner action: none.

SLIDE 2 (HIDDEN — NOT SHOWN IN LIVE DELIVERY)

What brought you here today?

OPENING POLL

What brought you here today?

Choose the closest reason. No explanation needed.

Promotion or larger role

Reorganization or role change

Internal move decision

External opportunity

My role feels static

General uncertainty

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

OPTIONAL / HIDDEN PRE-SESSION SLIDE — not part of the timed 0-8 live opening. Use only before the session begins, or as a producer/facilitator prompt.

WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

OPTIONAL — HIDDEN PRE-SESSION / PRODUCER SLIDE. Not part of the timed 0-8 live opening and does not count toward opening timing; the deck advances from Title directly into Welcome. Use only before the live session begins (informal room-reading while people arrive) or as a producer/facilitator prompt outside the timed sequence.

WHAT TO SAY (if used pre-session): Put the poll in chat or use Maven/Zoom polling. Ask people to choose the nearest reason, not explain.

TRAINER NOTE: This gives you the room without turning the session into personal consulting. Mention the top two patterns only if visible. Do not analyze individual answers.

SLIDE 3

Why I Built the Capability Position Read

WELCOME

Why I Built the Capability Position Read

Temidayo Afonja
Organizational capability strategist. Founder, The Density Group. Author, The Capability Audit.

For nearly two decades, I worked inside enterprise rooms where performance, promotion, capability, and organizational change were assessed.

"My performance had shaped my standing. It had not insulated the role from a change in structure."

That experience led me to build a more disciplined way to read what a role is forming, what travels, and what category of move the evidence supports testing.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

TIMING BAND 0:45 to 2:15

PARTICIPANT ACTION -

WHAT NOT TO SAY DO NOT: name the company; name individuals; allege motive; describe internal deliberations she did not attend; claim knowledge of alternatives considered, why the timing occurred, whether performance affected the decision, or whether the commitments were sincere; mention severance, negotiation or anyone else...

TRANSITION -

CUT-POINT GUIDANCE -

FULL SPEAKER NOTES (verbatim)

0:45 to 2:15, inside the 0–8 segment. THE OPENING STORY. Spoken, never read from the screen. Company unnamed. SPOKEN DELIVERY: 75–90 seconds maximum. Use the approved core script only. The remaining story evidence, prohibited claims, and response guidance below are facilitator reference, not additional spoken content.

Deliver only the cleared wording. All four previously held beats are now confirmed for delivery: the exact public title and responsibilities, what was tested about portability outside the company, what was made deliberately visible to people with hiring or advancement power outside the company, and what became clear only after the role ended. The Story Evidence Table holds the line-by-line basis and status.

THE GOVERNING FRAME. The four facts were real; the reading of what they protected was incomplete. Deliver them as things she believed, at the time, were evidence of security — not as things that objectively made the position secure. The correction is about the reading, not the facts.

TONE: reflective in substance, restrained in delivery. Findings, not feelings. Short sentences. Not aggrieved, not therapeutic, not vindicating. If it sounds like processing rather than teaching, it has drifted.

THE BEATS:

Eighteen years on the institutional side: development reviews, promotion slates, restructuring lists.

The remit: first person appointed into the remit and its sole holder. True of both the original global remit and the employee experience and belonging remit that followed. Describe the remit in general terms; do not name the title.

The four reasons she believed the position was secure, said plainly and in order, without building them into a case: she was the first and sole holder of the remit; executives trusted her judgment and asked for her read; her results and reviews were strong; the work was tied to commitments the organisation had made internally and publicly. Say them as what she believed made it secure, not as proof that it was.

The event, flat and once: "In March 2026, a reorganisation absorbed the function I led." Do not pause for effect.

The correction, said exactly: "Every one of those facts was still true when the role ended. None could prevent a structural decision." and "My performance had shaped my standing. It had not insulated the role from a change in structure." Do not say

“not one of them was protective” and do not say security had never come from performance.

The turn: eighteen years of knowing how institutions read people did not produce a clear reading of her own position; you cannot see the outside of a building you are standing inside.

CLOSE, VERBATIM: “The room reads your position whether or not you have.”

DO NOT: name the company; name individuals; allege motive; describe internal deliberations she did not attend; claim knowledge of alternatives considered, why the timing occurred, whether performance affected the decision, or whether the commitments were sincere; mention severance, negotiation or anyone else affected; diagnose which of the four states she was in; use grievance language.

IF ASKED WHICH COMPANY: “I keep the company out of it. The point is not who did it.”

This carries the authority load of the session, because retention, turnover and effectiveness figures are barred from serving as evidence that a Capability Formation score moves.

If the room goes quiet after the close, let it.

Learner action: none.

SLIDE 4

What this read will not do

BOUNDARY

What this read will not do

Read this first. It is what you can hold me to.

This read will not tell you to stay or leave.

It helps you determine what your current environment is building in you, what remains portable, and what category of move your evidence supports testing.

PRIVATE SCORING

Your scores, state, and workbook responses remain private. Only anonymous room-level counts are collected.

RECORDING BOUNDARY

Teaching segments only. Scoring, discussion, and writing time are never recorded.

This read informs a career decision. It does not replace financial, legal, medical, immigration, contractual or family judgment.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

4

TIMING BAND	2:15 to 3:15
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

2:15 to 3:15. BOUNDARY. Say the top line verbatim. People who came for permission to resign need to hear now that they will not get it here. People afraid of being told to leave need the same sentence. Say the promise sentence exactly as written: this read helps you determine what your current environment is building in you, what remains portable, and what category of move your evidence supports testing. Do not paraphrase it into "what kind of move the evidence supports" or "the move your position requires". State the recording boundary out loud even if you are not recording. It buys candour for the rest of the session. Safety language to keep available all session: state is not identity, exposure is not ability, current conditions are not a permanent verdict. Learner action: none. Workbook page 2 carries the same wording. [v4.11 — moved from slide face] What you score today is a position you occupy, and positions change. You will leave with a provisional read of your current state and the category of move your evidence supports testing. The specific move needs a read of context a group room does not have. Recording: teaching segments only; scoring, discussion and writing time are never recorded.

SLIDE 5

What gets weighed when the doors close

THE VANTAGE

What gets weighed when the doors close

Four questions. None of them appear on your review form.

1

How hard would this person be to replace?

2

Who outside this person's manager can vouch for the work?

3

Is this capability current, or was it current?

4

Does this person's value travel, or does it only work here?

Density and Optionality read the formation and portability questions underneath them.

The room reads your position whether or not you have.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

5

TIMING BAND	3:15 to 4:15
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

3:15 to 4:15. THE VANTAGE. Section 4 of the Field Kit, compressed. It establishes authority without a single statistic. Say the four questions slowly. Let the room notice that the performance rating is not among them. DO NOT say these four questions are Density and Optionality. They are not. A person can be hard to replace because of undocumented process, company-specific knowledge, weak succession, bottleneck ownership or plain institutional dependency, and none of that means the environment is still forming deeper capability. Replaceability is not Density. Say the closing line as written. Transition line into the next slide is on the slide: the room reads your position whether or not you have. Learner action: none. [v4.11 — moved from slide face] Full framing: these are questions institutional rooms often weigh; Density and Optionality read the formation and portability questions underneath them.

SLIDE 6

The question underneath the question

THE REFRAME

The question underneath the question

A fair question, and a reading that sits upstream of it.

WHAT YOU CAME IN ASKING

WHAT YOU NEED TO READ FIRST

“Should I stay in this role, or should I go?”

“Is this position still forming me, and does what it built travel?”

The first question is yours alone. The second sits upstream of it, and this room can read it more rigorously.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

6

TIMING BAND	4:15 to 5:15
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

4:15 to 5:15. THE REFRAME. This is the category-creation moment. Do not disparage the stay-or-move question and do not tell the room they arrived with the wrong question. It is the right question. Honour it, then show the reading that sits under it. Say it as: you are not wrong to be asking whether to stay. You are asking it without a reading of the position you would be staying in or leaving. Likely resistance: someone wants a yes or no today. Name that openly and point back at the boundary slide by name. Learner action: none. [v4.11 — moved from slide face] It also outlasts whatever is in the headlines: this reads your position against the category of disruption rather than the current episode.

CATEGORY DIFFERENTIATOR (say once, here — do not repeat elsewhere in the session): "Most career programs begin after you decide to leave. This workshop helps you determine whether leaving is even the right question." Say it plainly, without disparaging other programs, and move directly into Orientation.

SLIDE 7

How the two-hour session works

ORIENTATION

How the two-hour session works

Four moves. You will score yourself twice, in full, both times.

1	Initial read	All twelve statements. No evidence yet.
2	Calibration	The evidence protocol and three common misreadings.
3	Evidence-backed read	The same twelve, with evidence. You keep the first number.
4	Decide	Re-total, place again, and write your Next-Move Decision.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

7

TIMING BAND	5:15 to 6:30
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

5:15 to 6:30. ORIENTATION. Telling them the sequence lowers resistance to being corrected later. Say the number twelve out loud, twice. The full instrument is administered live on both passes. There is no proxy subset in this session. Likely misconception: the first score is the answer. Say plainly that the first score is raw material and the second one is the reading. Learner action: none. Workbook page 2. [v4.11 — moved from slide face] Framing for the first number: it is the reading you would have carried into a decision this week. [v4.11 — moved from slide face] Your first number is not a test you can fail. The word for what happens in between is calibration.

SLIDE 8

What You Will Leave With

OUTCOME

What You Will Leave With

By minute 105, you will have something concrete enough to revisit, not just a feeling about your role.

1

A DEFENSIBLE READING
Your initial reading and the evidence-backed reading your recent work can support.

2

A PROVISIONAL POSITION
A state or boundary reading, plus one category of move to examine.

3

A DECISION PROCESS
A completed Next-Move Decision, live 30-Day Evidence Review, and 90-day rescore date.

This is the tangible outcome before Q&A begins. The final 15 minutes help you apply it, not complete it.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

TIMING BAND	6:30 to 8:00
PARTICIPANT ACTION	None yet. Orienting to the session's shape before the instrument begins.
WHAT NOT TO SAY	Do not promise the process will be easy or comfortable. Do not promise a specific state or move category — that is what the session produces, not what it guarantees in advance.
TRANSITION	Say the closing line on the slide as written, then move directly into Density and Optionality.
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

6:30 to 8:00. OUTCOME. Closes the opening segment before Density and Optionality begin at minute 8.

WHAT TO SAY: “By minute 105, you will leave with three connected results.

First, a defensible reading: the initial reading you arrived with and the evidence-backed reading your recent work can support.

Second, a provisional position: a state or boundary reading and one category of move to examine.

Third, a decision process: a completed Next-Move Decision, the 30-day evidence process, the live 30-Day Evidence Review, and your 90-day rescore.”

WHAT NOT TO SAY: Do not promise the process will be easy or comfortable. Do not promise a specific state or move category — that is what the session produces, not what it guarantees in advance.

PARTICIPANT ACTION: None yet. Orienting to the session's shape before the instrument begins.

TRANSITION: Say the closing line on the slide as written, then move directly into Density and Optionality.

SLIDE 9

Density

DEFINITION ONE

Density

Learning velocity. Whether this environment is still forming you.

Density is whether the environment is still forming deeper capability in you.

A property of your conditions, not your effort. A role can be exhausting and form nothing.

Density is not workload, busyness, pressure or intensity.

A hard week is not evidence of formation.

Six statements, in a few minutes.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

9

TIMING BAND	8 to 14
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

8 to 14. DEFINE, THEN CORRECT THE DEFINITION, THEN SCORE. The definitional correction runs before the first score. If people score first and are corrected second, they defend the first number. Name the misconception out loud the first time you say the word. Learner action: none yet.

SLIDE 10

Optionality

DEFINITION TWO

Optionality

Market portability. Whether what you built is yours to carry.

Optionality is the portability and legibility of what you have built.

Two halves people collapse into one: whether the capability transfers, and whether anyone with power outside your manager has seen it.

Optionality is not having offers in hand.

Six statements. Twelve in total.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

10

TIMING BAND	8 to 14
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

8 to 14. DEFINE, CORRECT, THEN SCORE. The misconception here is quieter than the Density one. People hear Optionality as recruiter interest. Correct it before scoring. Useful line: an offer is an outcome of Optionality, not a measure of it. Learner action: none yet. [v4.11 — moved from slide face] Optionality is whether you could rebuild elsewhere, and whether the right people can already see why.

SLIDE 11

What AI changes about this reading

APPLICATION

What AI changes about this reading

Sixty seconds. An application of the two axes, not a new axis.

Where AI makes routine output easier to reproduce, your position depends more heavily on judgment, learning velocity, and capability that travels across unfamiliar problems.

AI does not create Compounding. It raises the cost of mistaking familiar output for growing capability.

We will return to this in the take-home appendix.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

11

TIMING BAND	8 to 14
PARTICIPANT ACTION	-
WHAT NOT TO SAY	DO NOT: recommend AI tools, teach prompting, name vendors, or use future-proofing language. This is an application of Density and Optionality, and it stays inside that frame. The appendix slide carries the fuller treatment. Workbook page 25 carries the take-home prompt. Learner action: none. [v4.11 — moved from...
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

8 to 14. BRIEF LIVE APPLICATION. Sixty to ninety seconds, taken from the definition block, not added to the session length. Say both sentences and stop. Do not open a discussion about tools here; if one starts, park it for the appendix or Q&A. DO NOT: recommend AI tools, teach prompting, name vendors, or use future-proofing language. This is an application of Density and Optionality, and it stays inside that frame. The appendix slide carries the fuller treatment. Workbook page 25 carries the take-home prompt. Learner action: none. [v4.11 — moved from slide face] That is a reason to read the two axes carefully; it is not a separate score.

SLIDE 12

Your initial read: statements 1 to 3

INITIAL READ

Your initial read: statements 1 to 3

Density. Live, silent. 1 strongly disagree to 5 strongly agree.

1

In the last ninety days I have been handed a problem I did not already know how to solve.

12345

2

I work close enough to people who are better than me that I can watch how they think.

12345

3

My work is reviewed by someone who can tell the difference between good and adequate, and who says so directly.

12345

No evidence line yet — that is deliberate. Workbook page 4.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

12

TIMING BAND	14 to 24
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

14 to 24. PASS ONE, BLOCK ONE OF FOUR. Roughly two and a half minutes. DO NOT ASK FOR EVIDENCE. This is the uncalibrated baseline and the evidence protocol has not been taught yet. Asking for evidence here collapses the entire two-pass design. DO NOT SIGNAL that the numbers are about to change. No "we'll see how accurate that was", no knowing smile. The baseline is contaminated the moment the room expects to be corrected. If asked whether they should justify a score: "Not yet. Score it as you read it. We will come back to evidence, and you will keep this number." Learner action: score statements 1 to 3 on workbook page 4. Scores stay private. Resist filling the silence.

SLIDE 13

Your initial read: statements 4 to 6

INITIAL READ

Your initial read: statements 4 to 6

Density, continued. Same window, same instruction.

4

The feedback I receive changes what I do next, not just how I feel.

12345

5

I regularly operate at the edge of my competence rather than the comfortable center of it.

12345

6

Looking back six months, the work I do now would have been genuinely hard for me then.

12345

No evidence line yet — that is deliberate. Workbook page 4.

The four states

TIMING BAND24 to 31

PARTICIPANT ACTION-

WHAT NOT TO SAY-

TRANSITION-

CUT-POINT GUIDANCE-

FULL SPEAKER NOTES (verbatim)

24 to 31. The subtitle is the load-bearing sentence and it is deliberately not a claim about causation. Say it as written: your current state reveals a form of exposure your job title cannot. Do not say that your state determines your exposure. Do not celebrate Compounding. The Field Kit case for that state is a person who thought it had nothing to tell them and was being passed over. Learner action: none. Recognition should be quiet here.

Read this before you place yourself

BEFORE YOU PLACE YOURSELF

Read this before you place yourself

The most important sentence in the session.

Not a performance rating, a potential rating, or a nine-box grid. It reads your conditions, not your worth.

1 **Performance and formation differ**

Strong reviews and flat formation are routine companions.

2 **State is not identity**

A current condition, not a permanent address.

3 **A low Optionality score is not a verdict**

Context-bound capability, weak translation, or limited exposure.

4 **Your first score is not wrong**

Uncalibrated is not wrong.

Hold this lightly. You will place yourself again after calibration.

FULL SPEAKER NOTES (verbatim)

24 to 31. PSYCHOLOGICAL SAFETY AND THE NINE-BOX. NEVER CUT UNDER TIME PRESSURE. Every experienced participant has been rated on performance against potential in a talent review. A two-by-two with four named quadrants gets pattern-matched to that grid silently unless you kill the association out loud. Say the top line verbatim. The fourth panel is load-bearing in Version 1.1. The two-pass design creates a risk the old design did not: participants concluding their first read was naive. Say it out loud. "Uncalibrated is not the same as wrong." Expand each panel from the workbook wording on page 6; the slide carries the headline only. ON THE OPTIONALITY PANEL, say it as written: a low Optionality score may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on ability or worth. Do NOT say it measures who has seen the work. Visibility alone does not create portability, and reducing the axis to visibility misreads half of it. Someone in this room is about to discover that a successful role has stopped forming them. This slide is what keeps that discovery useful instead of shaming. Learner action: none. Workbook page 6. [v4.11 — moved from slide face] Fuller wording of the four distinctions is on workbook page 6 (safety page). State is not identity; people move between squares. A low Optionality score is not a verdict on ability or worth. Your first score is uncalibrated, not wrong.

First placement

FIRST PLACEMENT

First placement

Your initial read, placed. Privately, and provisionally.

DENSITY: HIGH AT TOP, LOW AT BOTTOM

DEPTH TRAP	COMPOUNDING
STAGNANT	FRAGILE

Mark your square, then rate your confidence 1 to 5.

THE BOUNDARY RULE

If either score sits between 17 and 21, you are on a boundary. Read both neighbouring states.

OPTIONALITY: LOW AT LEFT to HIGH AT RIGHT

Hold this lightly. You place again in about forty minutes. Workbook page 7.

20

TIMING BAND	24 to 31
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

24 to 31. FIRST PLACEMENT. Ninety seconds. ROOM-LEVEL COUNT, ANONYMOUS: run the four-square count through the anonymous method chosen and tested before the room opened. Never a show of hands, never a one-word response. The session promises private scoring, and a public reveal breaks that promise first for the person whose square nobody else is in. Capture anonymized totals only. Do not record who is in which square. Do NOT interpret the distribution and do NOT say one square is usually heavier. Make sure they write the confidence number. It is easy to skip, and it is one of the things the second placement is compared against. Say "provisional" out loud. Say "you will do this again" out loud. It is what stops the first placement being heard as the verdict. Spoken line, not on the slide: small changes matter more near a boundary by construction, because a one-point move can cross the band. Learner action: tick a square, write a confidence number. Workbook page 7. Record the initial four-square count silently. Do not display, chart, or read out the initial state distribution until after the corrected placement. [v4.11 — moved from slide face] Confidence is one number beside the square; it is compared against the second placement.

Presenter Notes v5.2.1 · page 21

Open Part B now.

TIMING BAND	31 to 33
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

31 to 33. STAGED RELEASE OF PART B. Allow two minutes for release, opening and navigation; do not treat it as instant. Release Part B only after every first placement and confidence number in the room is complete. The first reading is only worth something if it was made before calibration was taught.

Tell the room to keep Part A open: they will need their initial Density and Optionality totals, their initial state, and their initial confidence to compare against later.

The two-hour calendar block is the binding constraint. The current designed core is 105 minutes, inside a two-hour calendar block. The final 15 minutes are reserved for Q&A and applications.

Learner action: open the second file (Part B).

SLIDE 22

Now we correct the reading.

CALIBRATION

Now we correct the reading.

Three things stand between a self-score and a defensible one: an evidence standard, three characteristic misreadings, and the difference between being valued and being formed.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. CALIBRATION SEGMENT OPENS. Frame this as a competence problem rather than an honesty problem. Nobody in the room is lying. The instrument is simply hard to point at yourself. Say what is coming: the evidence protocol, three misreadings, then they score all twelve again.

The evidence protocol

THE STANDARD

The evidence protocol

This is what your second reading has to survive.

Every corrected score requires an evidence line from the last ninety days. Every score, in both directions.

A 4 or 5

At least one clear positive instance from within the window.

A 3

The mixed or inconsistent pattern. A 3 is a reading, not an absence of one.

A 1 or 2

What repeatedly happened instead, a counterexample, or no qualifying instance in the window.

Cannot support it either way? Write your most defensible number and add one question mark: 3?, 4?, 2?. A 3 means mixed. A question mark means unsupported.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

TIMING BAND	33 to 48
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. THE PROTOCOL. Read aloud BEFORE the second pass, never before the first. This is where the old asymmetric rule died. Do NOT say "a 3 or higher without an instance drops to a 2" and do NOT say "a 1 or 2 needs no defence". Both are withdrawn under Instrument Version 1.1. They manufactured downward movement and contradicted the fact that capable people underrate themselves. SAY THE LOW-SCORE SENTENCE OUT LOUD: "A low score needs evidence too. If you are going to write a 2, I want to know what happened instead. Otherwise you are not being rigorous, you are being modest, and modesty is not a reading." SAY THE MARKER SENTENCE OUT LOUD: "You are not scoring a three because you do not know. A three means mixed. A question mark means unsupported. Those are different findings." Participants need permission for the question mark BEFORE they start, or they round down to look rigorous, which reproduces the exact artefact the old rule created. One question mark only, and it stays inside the 1 to 5 scale. The workbook will not accept 0?, 6?, or two question marks. Say the consequences: one or two marked items on an axis makes the placement provisional and triggers the neighbouring-score sensitivity check. Three or more and that axis is incomplete today. Learner action: none yet. Protocol only. Workbook page 9.

SLIDE 24

Scoring the intended life

CALIBRATION

Scoring the intended life

Misreading one.

HOW IT GETS SCORED

"My rotation into the new function was approved last month. Statement 1 gets a 4."

HOW IT SHOULD BE SCORED

The rotation starts in March. In the last ninety days I solved problems I already knew. Statement 1 scores a 2: no qualifying instance in the window.

An intention is not evidence. The ninety-day window exists to keep hope out of the number.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

24

TIMING BAND	33 to 48
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. MISREADING ONE. Read the wrong version in the voice of someone being reasonable, because they are. These examples are deliberately different from the ones in the Field Kit, so owners are not shown material they already bought. Note the corrected version carries an evidence line for the LOW score too. Under Instrument Version 1.1 a 2 has to be defended like anything else. Model that out loud. Ask: how many of you scored a plan rather than a fact? Do not predict the number of hands. Learner action: mark any statement they now want to rescore. [v4.11 — moved from slide face] Full corrected read (narrate): the evidence line says no qualifying instance in the window; it changes when the rotation does.

SLIDE 25

Confusing being valued with being formed

CALIBRATION

Confusing being valued with being formed

Misreading two.

HOW IT GETS SCORED

“Three VPs ask for my read before anything ships. Statement 3 gets a 5.”

HOW IT SHOULD BE SCORED

Being asked for my opinion is not review by someone who can tell good from adequate. Statement 3 scores a 2 — what happened instead was agreement.

Praise, dependence, seniority and internal reputation can all coexist with declining formation.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

TIMING BAND	33 to 48
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. MISREADING TWO. Give this misreading time. Do not rush past it and do not soften it. Safety line if needed: being needed by an environment is a real achievement. It is simply a different fact from being strengthened by it. The promotion application follows immediately and belongs to this misreading. Keep the two together and take the time for both out of this block, not out of the rescore. Learner action: mark statements to rescore. [v4.11 — moved from slide face] Full example (narrate): named to the steering committee; nobody has called the work merely adequate in two years.

SLIDE 26

Why promotion can stop forming a high performer

APPLICATION

Why promotion can stop forming a high performer

The same misreading, in the place it is hardest to see.

A promotion can increase responsibility, visibility and dependence while reducing formation.

A high performer moves into approvals, representation and familiar judgment. Expectations rise while unfamiliar problems fall.

This describes a possible change in Density. It does not assign a Career State without also reading Optionality.

Score the work, not the title. Take-home prompt on workbook page 25.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

26

TIMING BAND	33 to 48
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. APPLICATION OF MISREADING TWO. Ninety seconds, taken from this block. DO NOT claim that promotion produces Stagnation. What this describes is a possible fall in Density. Stagnant is a state on two axes, and nothing here reads Optionality at all. Someone whose Density falls after promotion while their Optionality stays high is not Stagnant, and only their own two totals can say where they are. Title the moment as written: why promotion can stop forming a high performer. Say the guard sentence on the slide out loud. If a recently promoted participant reacts, hold the frame: this is a question to score, not a diagnosis. Statement 1 and statement 5 are where it shows up. This is an application of Density, not a new concept and not a career-course module. Learner action: none live. Workbook page 25 after the session.

SLIDE 27

Reading low Optionality as a verdict on ability

CALIBRATION

Reading low Optionality as a verdict on ability

Misreading three.

HOW IT GETS SCORED

"Statement 10 is a 2. Nobody outside can see me because I am not senior enough."

HOW IT SHOULD BE SCORED

"Statement 10 is a 2: I have not published, spoken, or crossed a company boundary in three years. That is exposure — it tells me what to build."

A low Optionality score may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on your ability or worth.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM

27

TIMING BAND	33 to 48
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

33 to 48. MISREADING THREE. This one prevents damage. A capable person reading a low number as a verdict is the failure mode of the whole instrument. This is also where the symmetric protocol earns its keep: both versions score a 2, but only one of them has evidence under it. The number did not change. The reading did. Learner action: mark statements to rescore.

SLIDE 28

The whole map

CORRECTION MAP

The whole map

Five corrections. This is the argument for scoring again.

ENTERING BELIEF

"The work is demanding, so I must be growing."

"I would have options if I decided to look."

"This is what my role gives me."

"They rely on me here."

"A low score means I am not good enough."

EXITING BELIEF

"A demanding role can stop forming me and still feel full."

"Options depend on whether people outside can already see what I am good at."

"I scored the ninety days I actually lived."

"Being needed and being formed are separate conditions."

"A low Optionality score may be about translation or exposure, not ability."

30

TIMING BAND	64 to 71
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

64 to 71. SECOND PLACEMENT. NEVER CUT. Say the word "re-total" out loud. Participants otherwise carry the first number forward without noticing. If any axis carries a question mark, the next slide runs before they place. Do not let a marked axis be placed without the neighbouring-score sensitivity check. ROOM-LEVEL COUNT, ANONYMOUS: corrected confidence distribution and the four-square count again, through the anonymous method, as totals only. DO NOT ask what moved until the placement is complete. That is the sequence rule and breaking it invalidates the movement counts. Learner action: re-total, place again, record corrected confidence and date. Workbook page 16.

SLIDE 31

When the evidence remains uncertain

SECOND PLACEMENT

When the evidence remains uncertain

The neighbouring-score sensitivity check. An operational pilot convention, not a statistical confidence interval.

- 1 Total the axis using the numbers exactly as you wrote them.
- 2 Total it again with every marked item one point lower.
- 3 Total it again with every marked item one point higher.
- 4 If all three stay on the same side of 19, and none lands between 17 and 21, place and mark it provisional.
- 5 If they do not, do not pick one square. Read both neighbouring states.

Keep every neighbouring score inside the 1 to 5 scale. A 1? is never tested at 0 and a 5? is never tested at 6. Three or more marked items on one axis: that axis is incomplete and you do not place on it today.

TEMIDAYO AFONJA | TEMIDAYOAFONJA.COM 31

TIMING BAND 64 to 71

PARTICIPANT ACTION -

WHAT NOT TO SAY -

TRANSITION -

CUT-POINT GUIDANCE -

FULL SPEAKER NOTES (verbatim)

64 to 71. THE UNCERTAINTY PROCEDURE. NEVER CUT. NAME IT: the neighbouring-score sensitivity check. Use that name every time, in the room and in the workbook. SAY THE BOUNDARY OUT LOUD: this is an operational convention for the pilot. It is not a statistical confidence interval and it does not carry a margin of error. It asks one question: would a plausible neighbouring value change where you place yourself? Uncertainty-marked scores stay bounded by 1 and 5. A 1? is never tested at 0. A 5? is never tested at 6. When plausible neighbouring values change the placement, or when any of the three totals touches the 17 to 21 boundary band, no single state is assigned. Read both neighbouring states and mark the placement provisional. Walk it on the board with one made-up example. Forty seconds, and it prevents five minutes of confusion. WORKED EXAMPLE: 4, 4, 4, 3, 4 and a 3-marked. Total 22. Lower the marked item: 21. Raise it: 23. The range touches 21, which is inside 17 to 21, so that person reads both neighbouring states rather than picking one. INCOMPLETE AXIS: expect it, and say it as a finding. "Three or more items you could not support means we do not have ninety days of evidence on that axis. That is a result about the window, not about you. Usually leave, a transition, or a role you had only just started." ROOM-LEVEL COUNT, ANONYMOUS, and this is the priority measure of the pilot: number of participants with one or more marked items; number with an incomplete axis; number for whom the check changed the placement or held it open. Collect all three through the anonymous method, as totals only. Never by hands. Learner action: run the check, then place. Workbook page 16.

What moved

WHAT MOVED

What moved

Both readings, side by side. Three anonymous counts.

Did at least one of your two axis totals change by two or more points?

Did your square change between the first and second placement?

Did your confidence go down, stay the same, or go up?

Nothing about your working life changed while you were scoring. Only the reading did.

32

TIMING BAND	71 to 77
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

71 to 77. THE MOVEMENT MOMENT. ROOM-LEVEL COUNT, ANONYMOUS: three counts, through the anonymous method only. Asking who is Stagnant, whose square changed or whose confidence fell by a show of hands contradicts the privacy promise made at the start, and the people least likely to raise a hand are the ones the question is about. Totals only. Say the calibration claim as written. They supplied the evidence, the interpretation and the corrected score. The room supplied a fixed window, a symmetrical evidence standard, named misreadings and a structured correction process. Do not say they calibrated against something other than themselves. State no expectation before you count. Do not say most people's numbers move and do not say some change quadrant. After enough deliveries these become stated figures on this slide; until then they are questions, not claims. IF NOBODY MOVES: do not improvise an explanation. Say plainly that this room scored strictly on the first pass, ask who found an instance harder to name than expected, and move on. A room that does not move is a finding, not a failure. ON CONFIDENCE: say the line as written. A confidence number that fell can be useful when the original certainty rested on an untested assumption. Do not say a fall is automatically a good outcome. A fall caused by confusion about the protocol is not transformation, it is a delivery problem, and you want to know which one you produced. If several people report the drop came from not understanding the instruction, note it on the capture sheet as a delivery defect. Learner action: complete workbook page 17 immediately after placement. [v4.11 — moved from slide face] You calibrated the first reading against a fixed window, a symmetrical evidence standard and named misreadings rather than intuition alone. A confidence number that fell can be useful when the original certainty rested on an untested assumption.

SLIDE 33

What just happened

WHAT JUST HAPPENED

What just happened

And what it says about every self-assessment you have ever completed.

Self-assessment has a structural limitation: the same person supplies both the evidence and the judgment.

It is not useless; it needs a disciplined correction process.

What corrected your number was not new information. It was a fixed window, evidence in both directions, and three named misreadings. That is calibration.

FULL SPEAKER NOTES (verbatim)

77 to 84. WORKBOOK PAGE 20. Two to three minutes of quiet writing. Do not narrate over it. Spoken line rather than a slide: a person moves between states, and the same role can change state around a person who did not move at all. Optionality can lag a change in Density. Small changes matter more near a boundary by construction. CUT POINT: if you are more than four minutes behind at this slide, reduce this to ninety seconds and say "finish workbook page 20 after the session". Do NOT send unfinished state interpretation into the thirty-day evidence log on page 23. That log is for action and outcome evidence, not for unfinished state work. Never take the time from the rescore or the Next-Move Decision. Learner action: complete workbook page 20.

SLIDE 37

Seven categories of move

MOVE CATEGORIES

Seven categories of move

Direction, not a plan. Your evidence helps you choose which category to test. Workbook page 21.

1

Remain and deepen
The formation conditions are real and worth protecting.

2

Translate what is built
The capability exists. The language for it does not.

3

Widen exposure
The work is good and the wrong people have seen it.

4

Test portability
Find out what travels before you need it to.

5

Repair formation conditions
Change the work, not the employer, first.

6

Prepare for exit
Your evidence gives you reason to prepare in case the conditions do not repair.

7

Seek an external perspective
High stakes, incomplete evidence, or a boundary position.

No square prescribes a category. Your evidence and constraints still apply.

3

YOUR 90-DAY RESCORE
Repeat the evidence-backed reading and notice what changed in your work, evidence, or position.

Today's assessment is complete. The follow-through helps you test whether the reading changes.

100 to 105. THE CLOSE. Do not send everybody to the same place. The Field Kit unlocks at the end of this session, not at purchase. Say that it is already theirs. It is not an offer. The free Diagnostic is an uncalibrated public entry signal and it is for someone they would send it to. It is NOT the rescore tool. Say that plainly: you have been calibrated, and Section 7 of the Field Kit is what holds that standard. The book is NOT mentioned here. It moves to the follow-up email, so the last live moment stays on the participant's own decision rather than on a purchase. THE INDIVIDUAL WRITTEN POSITION READ IS DELIBERATELY ABSENT FROM THIS CLOSE. The offer is built and priced, but it is held off the public close until after pilot two. Do not gesture at it, do not mention it as coming, do not describe it as the next step for anyone, and do not take names for it here. There is no boundary route to it. If a participant asks unprompted, answer honestly and take it offline. Learner action: none. [v4.11 — moved from slide face] Nothing here is withheld; today's read is complete on its own.

SLIDE 42

You have read your position. The move is the next conversation.

100 to 105. CLOSE. End on the rescore date. A dated commitment is what converts diagnostic clarity into a decision you can measure. Do not add an offer here. The previous slide did that work. FINAL FACILITATOR TASKS, within twenty-four hours: write up the anonymized room-level counts while the room is fresh, including the three sensitivity-check counts; send the Field Kit and the Complete Session Record immediately; send the teaching-only replay within twenty-four hours if recording was used. Record no workbook responses, no employer names and no third-party names.

Questions and applications

TIMING BAND	105 to 120
PARTICIPANT ACTION	-
WHAT NOT TO SAY	-
TRANSITION	-
CUT-POINT GUIDANCE	-

FULL SPEAKER NOTES (verbatim)

105 to 120. Q&A AND OPTIONAL APPLICATIONS.

WHAT TO SAY: State the boundary line on the slide once, plainly, before opening the floor.

MAY SUPPORT: Understanding a statement. Interpreting a boundary reading. Identifying an evidence-building question. Distinguishing move categories. Applying the read to a promotion or reorganization scenario. Knowing when to seek an external perspective (legal, financial, career counseling).

DO NOT ANSWER: Whether someone should resign. Whether an employer will eliminate a role. Legal, immigration, financial, medical, compensation, or tax questions. Whether a score is good or bad.

IF ASKED WHETHER A SCORE IS GOOD OR BAD: "There is no good or bad score here — there is only what your evidence currently supports and what it does not yet support."

IF PRESSED FOR A STAY-OR-LEAVE ANSWER: Restate the boundary line rather than inventing a softer version of it.

CLOSE: Thank the room. Point back to the rescore date already written in the workbook — no new slide needed.

Position Exposure Signals

APPENDIX

Position Exposure Signals

Questions to investigate, not predictions.

YOUR CURRENT ROLE

Is the mandate being absorbed, narrowed, duplicated or repeatedly redefined?

Does the position depend on one sponsor?

Is most of the value legible only inside one context?

Is the work becoming less formative while expectations remain high?

Is the organisation redesigning the work without a clear future role for the capability?

A ROLE OR ORGANISATION YOU ARE CONSIDERING

Why is the role open?

What work has been added, removed or consolidated in the past year?

Who can distinguish excellent work from adequate work?

Where have people in this role moved next?

How is AI changing the actual work?

These signals do not predict a layoff. They identify questions that should be answered before you treat a position as secure.

APPENDIX. NOT IN THE CORE SCORING SEQUENCE. Use in Q&A, in the replay, or point people at workbook page 26. Do not run it inside the scoring sequence and do not let it displace the calibration work. TITLE DISCIPLINE: this is "Position Exposure Signals". It is not layoff warning signs and it is never framed as a promise to predict. Say the standing boundary out loud whenever the slide is used: these signals do not predict a layoff, they identify questions that should be answered before you treat a position as secure. If someone asks whether they are about to be made redundant, do not answer it. Hand back the questions and, where the stakes are high, name the seventh move category: seek an external perspective. Nothing here is a claim about any employer, including any of mine.

SLIDE 45

AI and Compounding

APPENDIX

AI and Compounding

An application of the two axes. Not a technology session.

Where AI makes routine output easier to reproduce, your position depends more heavily on judgment, learning velocity, and capability that travels across unfamiliar problems.

AI does not create Compounding. It raises the cost of mistaking familiar output for growing capability.

Read it through the statements you already scored: statement 1 for unfamiliar problems, statement 5 for the edge of competence, statement 11 for what transfers.

Take-home prompt on workbook page 25: which part of your output is becoming easier to reproduce, and which part of your work is deepening judgment another context would value?

APPENDIX. FULLER TREATMENT OF THE BRIEF LIVE APPLICATION. Use in Q&A or in the replay. The live session carries the two sentences only. DO NOT: name or recommend AI tools, teach prompting, recommend vendors, or use future-proofing language. Any of those turns a capability reading into a technology talk and the product is not that. If pressed for tool advice, decline plainly and return to the axes: the question this instrument answers is what the work is forming in you and whether it travels. Workbook page 25 carries the take-home prompt.

What translation actually means

APPENDIX

What translation actually means

An application of the second move category. Not part of the timed core.

Legibility is not bragging. It is evidence translated into language another context can understand.

The problem
What was actually hard, stated without your job title.

The outcome
What changed, in terms someone outside can weigh.

The capability
What the work formed in you that would travel.

You do not need louder confidence. You need claims that can survive evidence.

Take-home prompt on workbook page 25.

FULL SPEAKER NOTES (verbatim)

APPENDIX. MOVED OUT OF THE TIMED CORE IN v4.8. Use in the Q&A time or the replay. This is not a confidence module and not a mindset module. Do not build one. It is the operational content of "Translate what is built". Say both sentences as written. Legibility is not bragging, it is evidence translated into language another context can understand. You do not need louder confidence, you need claims that can survive evidence. Teach the three-part translation and stop: the problem, the outcome, the capability the work formed. Then say the discipline: remove adjectives about yourself. A job interview is one application of this and may be named as one. Do not reposition the session as interview coaching or a job-search course, and do not take interview questions here; point at the workbook page and the appendix. Learner action: none live. Workbook page 25 after the session, and the material stays on that page whether or not this slide is ever shown.
