88	SILENT WRITING START
94	TWO-MINUTE WARNING
96	END WRITING
100	BEGIN CLOSE
105	Q&A
120	END

v1.1 CORRECTIONS

- No recording for first solo delivery
- No identifiable polling fallback — private chat/DM is never anonymous
- If anonymous poll fails, skip the metric — do not improvise a substitute
- Corrected room count (Poll B) drives state-cost depth, not the first-placement count
- Part B waits for the anonymous first-read readiness question, not a visual scan
- Scores and workbooks stay private

STANDING REMINDERS

- No state prescription
- No “good” or “bad” score
- No employment decision
- One or two ? = provisional
- Three+ on axis = incomplete
- Low scores require evidence too
- Field Kit sent after session
- 30-Day Evidence Review included

Q&A BOUNDARY

*“I can help you clarify what your evidence supports.
I cannot make the employment decision for you.”*

TIME RECOVERY

CUT FIRST: voluntary reads → extended state-cost discussion → extra calibration examples

NEVER CUT: initial read → evidence protocol → second read → sensitivity →
corrected placement → eight-minute writing → close
