

0	Start
8	NEW-ENTRANT CUTOFF / METHOD BEGINS
14	Initial scoring
24	Place (A1 ready → A2 placement)
31	PART B — RELEASE ONLY WHEN A1+A2 READY
33	Calibration
48	Second read
64	SENSITIVITY, THEN FINALIZE PLACEMENT
71	What moved
77	State cost
84	Move category
88	SILENT WRITING START
94	TWO-MINUTE WARNING
96	END WRITING
100	BEGIN CLOSE
105	Q&A — HARD START
120	END

PRIORITY REMINDERS

- No recording for first solo delivery
- No identifiable polling fallback — private chat/DM is never anonymous
- If anonymous poll fails, skip the metric — do not improvise a substitute
- Corrected room count (Poll B) drives state-cost depth, not the first-placement count
- Part B releases only after: A1 full response + all Ready, then A2 full response
- Never display or read aloud a count of 1 — small cells stay internal
- New entrant: no admission after minute 8. Reconnection: may readmit at next pause
- Scores and workbooks stay private

STANDING REMINDERS

- No state prescription
- No “good” or “bad” score
- No employment decision
- One or two ? = provisional
- Three+ on axis = incomplete
- Low scores require evidence too
- Field Kit sent after session
- 30-Day Evidence Review included

Q&A BOUNDARY

*“I can help you clarify what your evidence supports.
I cannot make the employment decision for you.”*

TIME RECOVERY

Q&A HARD-STARTS AT 105 — not a buffer. Recover time before 105; only a technical failure may cut Q&A.

CUT FIRST: voluntary reads → extended state-cost discussion → extra calibration examples → appendix discussion

NEVER CUT: initial read → evidence protocol → second read → sensitivity →
corrected placement → eight-minute writing → close
