

The Career Stall Check

How to Tell If Your Career Is Stalling

Write privately. This is not the full Capability Position Read — no scoring, no state placement, no Next-Move Decision. Four questions, tested against your last 90 days.

1. Which sign is most present for me?

Repeating instead of stretching | Indispensable but mainly here | Responsibility growing faster than capability

2. What is one example from the last 90 days?

Use a lived example, not a plan, promise, title, or feeling.

3. What capability, learning, or future option may not be growing?

Name the specific thing, not a general sense that something is off.

4. What is the next question I need to investigate?

The question you would need to read more carefully before making a bigger career decision.

This artifact is a recognition tool. It does not calculate Density or Optionality, place you into a Career State, or replace the full evidence-backed read.

For the full evidence-backed read: Decide Whether to Stay or Leave Your Job — A Live Career Growth Assessment. The Capability Position Read.
