

FREE CAREER ACCOMPLISHMENT TRACKER

KEEP THE PROOF

The 10-Minute Career Evidence Starter

Turn one accomplishment into proof you can use in a performance review, interview, internal move, or career pivot.

One accomplishment. One Proof Line.

WHAT YOU WILL BUILD

- THE CONDITION
- YOUR PART
- THE SCOPE OR CONSTRAINT
- THE OUTCOME
- THE SUPPORT

Before You Rebuild Anything

When work changes suddenly, the first thing to go is often the way you describe yourself. People with years of good work behind them start saying they are starting over, starting from scratch, going back to zero.

Those words can feel true in a hard week. They are rarely accurate, and they shape what you let yourself try.

WORDS THAT HOLD

Read these slowly, out loud if you can, before you begin.

I have done work that mattered, and I can name it.

What I built did not leave when the job did.

I can be experienced and new at the same time.

I can learn what the next place requires.

I will tell the truth about my work, without shrinking it and without inflating it.

I can carry hope and uncertainty in the same week.

If you catch yourself saying you are starting over, try a different sentence: I am starting from what I have built.

Then choose one piece of work. The next pages help you prove it.

WHY I MADE THIS

"I used to think I would remember the work that mattered. I don't.

I created Keep the Proof after seeing how quickly the details behind good work disappear: what was true before, what you contributed and why the result mattered.

For this Starter, you only need one piece of work. Let's make it usable before you forget it."

Temidayo Afonja

Choose one accomplishment worth remembering.

Do not try to reconstruct your entire career. Choose one project, assignment, decision, problem, launch, redesign, client engagement, process improvement or piece of work from the recent past that mattered. Then complete the seven prompts that follow.

CHOOSE SOMETHING WHERE AT LEAST ONE IS TRUE

- Something changed because you were involved.
- You made a judgment call.
- You solved or prevented a meaningful problem.
- Someone relied on your expertise.
- You learned something you could use again.

QUICK CAPTURE

Write it down fast, before the detail fades. Two lines is enough.

THE WORK

ROUGHLY WHEN

WHY IT MATTERED

BEFORE YOU WRITE

Check each one before you write. If you cannot check it, leave that detail out.

- ☐ I am recording my own recollection, and information I am permitted to retain.
- ☐ I am not copying, forwarding, photographing or reproducing confidential or employer-owned material.
- ☐ I am not including protected customer, employee or proprietary company information.
- ☐ Where I am unsure whether I may retain something, I have left it out.

This is educational material, not legal advice.

BUILD THE EVIDENCE

What happened?

Start with a truthful account of what changed. A number can come later, if you have one you may keep.

PROJECT OR WORK EVENT

--

1 THE CONDITION

What was true before I got involved?

What problem, condition, constraint or need existed?

2 YOUR PART

What was my specific contribution or judgment?

What did you notice, decide, influence, build, change or prevent? Your part, not everything the team did.

3 THE SCOPE OR CONSTRAINT

How big was it, and what limits did I work within?

The size of the team, audience, timeline, or problem, stated only as far as you are permitted.

4 THE OUTCOME

What changed?

What improved, became possible, moved, disappeared or was prevented?

5 THE SUPPORT

What evidence supports this?

What makes the account defensible? Use only accurate and permitted evidence: a measured result, an observable change, a public source, documented feedback, a role-based verifier, or a before and after condition.

What does this work show you can do?

6 WHAT COULD I PLAUSIBLY DO AGAIN?

Move beyond the project name. What did this work require you to know how to do?

Diagnose an unclear problem

Bring structure to ambiguity

Influence across functions

Improve a process

Make a difficult tradeoff

Translate technical information

Build trust

Lead through change

Identify risk

Redesign an experience

These are examples. What did your work require?

7 REMOVE THE INTERNAL LANGUAGE

Which words only make sense inside your current company?

INSIDE YOUR COMPANY

Project Horizon

QBR

XYZ Workflow

OUTSIDE YOUR COMPANY

Cross-functional onboarding redesign

Operating review

Customer intake process

This shows the distinction. The terms will differ by workplace.

INTERNAL PROJECT NAME

INTERNAL ACRONYM OR SYSTEM

COMPANY-SPECIFIC LANGUAGE

How would you explain the same work to someone who has never worked there?

YOUR PORTABLE PROOF LINE

Turn the evidence into one portable line.

Combine, in whatever order reads well, up to five ingredients into one line: **the condition, your part, the scope or constraint, the outcome, and the support.**

Use this as a scaffold for thinking. Rearrange it so it sounds like you.

BEFORE

"Led Project Horizon onboarding work."

PORTABLE

"Redesigned new-hire onboarding for a growing operations team, cutting time to full productivity and reducing early attrition, with the model later adopted by two other departments."

MY PORTABLE PROOF LINE

CAN IT TRAVEL?

- ☐ Someone outside my company could understand it.
- ☐ It separates my contribution from the team result.
- ☐ I could defend it if someone asked a second question.
- ☐ I have removed anything I am not permitted to retain or disclose.

YOU FINISHED IT

You did it.

You now have one piece of work you can explain without relying on your title, project name or company vocabulary.

WHERE YOU CAN USE IT

Performance review

Interview

Promotion conversation

Resume

Internal move

Career pivot

Adapt the evidence to the conversation. Do not reuse one sentence mechanically everywhere.

SEND ME YOUR PROOF LINE

I would like to see what you wrote. Email the Proof Line you built to temidayo@thedensitygroup.com. With your permission, I may share it, without your name or company, to help someone else get started. I will always ask before I share anything.

One Proof Line is useful.
A record is more powerful.

This Starter proves one thing.
Keep the Proof builds the record.

Keep the Proof

A guided system for building your professional record.

If this exercise helped you see one accomplishment more clearly, Keep the Proof gives you the full method, a Professional Record you keep and control, and printable and fillable tools for building the record over time.

temidayoafonja.com/keep-the-proof

Your career evidence should not have to be reconstructed from memory after the context changes.
