

A LIVE CAPABILITY POSITION READ

Should I Stay or Should I Move?

Read what your current work is building before you decide.

Bring the last ninety days of your actual working life. Every score in this workbook is made against that window and nothing else.

YOUR NAME

DATE

Temidayo Afonja

Founder, The Density Group. Author, The Capability Audit.

PART A · INITIAL READ v1.3 · INSTRUMENT VERSION 1.1 · FILLABLE

This is a fillable document. Enter your responses directly into the fields and save a copy when complete.

For automatic totals, open this workbook in Adobe Acrobat Reader on a laptop or desktop. In some browser and mobile viewers, the fields remain typeable, but automatic calculations may not run.

Before you start

Read this page while people are arriving.

This session will not tell you to stay or leave. It will help you read what your current environment is building in you, what remains portable, and what category of move your evidence supports testing.

What you score today is a position you occupy, and positions change.

HOW THE TWO-HOUR SESSION WORKS

1 Initial read

You score all twelve statements as you read them today. No evidence required yet. This is your uncalibrated baseline.

2 Calibration

The evidence protocol, the three ways capable people misread their own position, and the correction map.

3 Evidence-backed read

You score all twelve again, this time with evidence in both directions. You keep the first number.

4 Decide

Re-total, place yourself again, and write your Next-Move Decision.

Your first score is not a test you can fail. It is the reading you would have carried into a decision this week, and it is worth capturing before anything corrects it.

A NOTE ON THIS SESSION

This is a founding pilot, and you are helping refine the delivery and evidence process. The instrument itself is frozen at Version 1.1 and is not being changed by this room. Room-level totals are recorded without names, individual scores, or identifiable responses. Nothing you write in this workbook is collected. Thirty days from now you will get one short set of questions about what actually happened, and answering it is optional.

This read informs a career decision. It does not replace financial, legal, medical, immigration, contractual, or family judgment.

SECTION 1

Your initial read

Twelve statements, scored against the last ninety days you actually lived. No evidence yet, and that is deliberate.

Your initial read

Density. Learning velocity, whether this environment is still forming you.

Score 1 strongly disagree to 5 strongly agree, against the last ninety days you actually lived. Type a number in each box. No evidence line yet, and that is deliberate.

- 1 In the last ninety days I have been handed a problem I did not already know how to solve. 1 - 5
- 2 I work close enough to people who are better than me that I can watch how they think. 1 - 5
- 3 My work is reviewed by someone who can tell the difference between good and adequate, and who says so directly. 1 - 5
- 4 The feedback I receive changes what I do next, not just how I feel. 1 - 5
- 5 I regularly operate at the edge of my competence rather than the comfortable center of it. 1 - 5
- 6 Looking back six months, the work I do now would have been genuinely hard for me then. 1 - 5

Add the six answers. Density, initial (out of 30):

19 to 30 is high on this axis. 6 to 18 is low.

Any score between 17 and 21 is a boundary, even a high one.

Your initial read

Optionality. Market portability, whether what you built is yours to carry.

Score 1 strongly disagree to 5 strongly agree, against the last ninety days you actually lived. Type a number in each box. No evidence line yet, and that is deliberate.

7 The capability I am building would be valued by an employer in a different industry. 1 - 5

8 I can describe what I do in terms of outcomes, not just my company's internal language. 1 - 5

9 If my role disappeared tomorrow, the capability I built would still be mine to carry. 1 - 5

10 People with the power to hire or advance me, inside or outside my company, can already see what I am good at. 1 - 5

11 What I am learning is a transferable capability rather than a company-specific procedure. 1 - 5

12 I could rebuild a strong position somewhere else within a year. 1 - 5

Add the six answers. Optionality, initial (out of 30):

19 to 30 is high on this axis. 6 to 18 is low.

Any score between 17 and 21 is a boundary, even a high one.

Read this before you go further

Four distinctions. Each one changes how the square should be read.

Performance and formation are different readings

Performance measures what you delivered for somebody else. Formation measures what the work is doing to you. Strong reviews and flat formation are routine companions.

State is not identity

A current condition rather than a personality type or a permanent address. People move between squares.

A low Optionality score is not a verdict

It may reflect context-bound capability, weak translation, limited exposure, or a combination. It is not a verdict on your ability or worth.

Your first score is not wrong

It is uncalibrated. Those are different things, and the uncalibrated read is what everybody carries into a decision until something corrects it.

This is not a performance rating, a potential rating, or a nine-box grid. It reads your conditions, not your worth to an employer.

First placement

Your initial read, placed. The position you were carrying when you walked in.

DENSITY, INITIAL

 / 30

OPTIONALITY, INITIAL

 / 30

DENSITY: HIGH AT TOP, LOW AT BOTTOM

☐ DEPTH TRAP Deep expertise fused to one context.	☐ COMPOUNDING Deep capability that travels.
☐ STAGNANT The work stopped asking more of you.	☐ FRAGILE Options on paper, not enough depth beneath.

OPTIONALITY: LOW AT LEFT TO HIGH AT RIGHT

TICK YOUR SQUARE ABOVE, THEN COMPLETE THESE

MY INITIAL STATE

CONFIDENCE IN THAT PLACEMENT, 1 TO 5

19 to 30 is high on an axis. 6 to 18 is low. Any score between 17 and 21 is a boundary, even a high one, and you read both neighbouring states. Hold this placement lightly: you will do it again, on different numbers, in about forty minutes.
