

Free Flagship SOP — 60-Minute Edition

Stay or Leave? — Live Career Growth Assessment · v2.0.9 CANDIDATE · Revised Saturday, September 19, 2026 at 8:30 AM CT

PRODUCTION REVISION STAMP — Revised Saturday, September 19, 2026 at 8:30 AM CT

Capability_Formation_Free_Flagship_SOP_Sept23_2026_60MIN_v2.0.9_CANDIDATE

CANDIDATE — this SOP governs a product that has not yet been delivered in its 60-minute form. Promotion to FINAL requires all three of: Rehearsal 1 (timed content) passing, Rehearsal 2 (production) passing, and the workbook behaviour test passing in Adobe Acrobat Reader.

1. Event identity and locked decisions

Field	Value
Public title	Stay or Leave? — Live Career Growth Assessment
Expanded descriptor	A Live Career Growth Assessment
Method	The Capability Position Read
Format descriptor	Participant-facing: FREE GUIDED ASSESSMENT · 60 MINUTES. “Free Flagship” stays internal, in this family and in filenames only.
Maven format	Lightning Lesson. Never “Lightning Course.” Participant-facing language may also call it a free live guided assessment.
Date	Wednesday, September 23, 2026
Time	6:00–7:00 PM Central Time / America/Chicago
Price	\$0. Free for this launch.
Total duration	60 minutes, hard stop. 50 minutes guided read + 10 minutes live-only Q&A.
What it does	Helps participants read their current capability position.
What it does not do	It does not tell anyone whether to stay in or leave a job, and it is not legal, medical, financial, immigration or mental-health advice.

The September 9 Lightning Lesson is a separate event with people already registered. It is unchanged and out of scope for this document.

Use CT / Central Time / America/Chicago. Never write CST.

2. Master reconciliation table

This table is the operational source of truth; where any other document disagrees with it, the table governs. It runs across the two landscape pages that follow — seven timing rows here, the remaining six on the continuation page, which repeats the column header.

Time	Block	Slides	WB	Facilitator action	Participant action	Recording
0:00-2:00	Welcome, purpose, recording disclosure and boundaries	1-3	1	Welcome, name method and duration. Biography capped at two sentences. Deliver the recording and privacy disclosure.	Open the workbook at page 1.	RECORDING ON — start on slide 1
2:00-5:00	Density and Optionality	4-5	1	Define each axis and give the one correction that matters. No questions taken.	Listen. Nothing written yet.	RECORDING ON
5:00-12:00	Initial read of all 12 statements and totals	6-11	2-3	Read each statement once, then stay silent. Announce each block. Add both totals.	Score 1-12 privately. Add both totals. No evidence lines yet.	RECORDING ON
12:00-14:00	First provisional position	12-13	3	Name the four states. Say the 17-21 boundary override and state-is-not-identity out loud.	Cross the two totals. Mark a square or boundary. Rate confidence 1-5.	RECORDING ON
14:00-19:00	Evidence protocol and the three misreadings	14-15	4	Teach the protocol, then all three misreadings on one slide, sixty seconds each.	Follow along. Run the three checks against the first numbers.	RECORDING ON
19:00-31:00	Evidence-backed rescore of all 12 statements — PROTECTED	16	5-6	Hold this slide. Stay silent. Two-minute warning at 29:00, thirty seconds at 30:30.	Rescore all twelve with a short evidence phrase under each.	RECORDING ON
31:00-35:00	Corrected totals and corrected position	17-19	5-7	Insist on the re-total. Teach the three sensitivity tiers. Restate the boundary override.	Re-total both axes. Run sensitivity if 1-2 marked. Place, or mark boundary/incomplete. Rate confidence 1-5.	RECORDING ON

Master reconciliation table — continued

Time	Block	Slides	WB	Facilitator action	Participant action	Recording
35:00-38:00	Four states and their immediate costs	20	—	Forty-five seconds per state. Do not deepen any one square.	Listen. Read your own square's cost.	RECORDING ON
38:00-41:00	Seven categories of move	21	8	Read each category and its one-line reading. Say the no-square-prescribes rule.	Identify the category the evidence supports testing.	RECORDING ON
41:00-45:00	Complete the Next-Move Note	22	8	Read the three prompts once, then stop talking. Sixty-second warning at 44:00.	Write the three lines.	RECORDING ON
45:00-48:00	Continuation routes and evergreen close	23-25	8	Two routes, the Field Kit in sixty seconds, then the close. No pricing spoken.	Choose a route, or none. Write a rescore date ninety days out.	RECORDING ON
48:00-50:00	Facilitation buffer and recording stop	25	8	Hold the close slide. Absorb any overrun. At 50:00 STOP THE RECORDING — do not pause it — and confirm on screen.	Finish writing.	RECORDING ON → STOPS AT 50:00
50:00-60:00	Live-only Q&A, not recorded	26	—	Confirm aloud that recording has stopped. Method questions only. Hard stop at 60:00.	Ask method questions. No scores, states or employers disclosed.	RECORDING OFF

The 19:00-31:00 evidence-backed rescore is PROTECTED. Never recover lost time by shortening it. Recover from 45:00-48:00 first, then the 48:00-50:00 buffer.

3. Recording policy

RECORD MINUTES 0-50 ONLY.

- Start the recording on slide 1, the first evergreen teaching slide. The dated holding slide is shown BEFORE recording begins and is never recorded.
 - Deliver the recording and privacy disclosure within the first five minutes — it sits on slide 3 at minute 1:20.
 - At minute 50, STOP the recording BEFORE inviting participant questions. STOP IT; DO NOT PAUSE IT. Look at the screen and verify it has actually stopped before the first question is taken.
 - PRE-SESSION ONLY: if the integration auto-records when the host enters early, PAUSE for the holding period, start or resume on slide 1 at 6:00 PM CT, and STOP at 6:50. Pausing belongs to that window and nowhere else.
 - Say out loud that the recording has stopped, then advance to the Q&A slide.
 - Minutes 50-60 are live-only Q&A. Never distribute participant Q&A in the replay, under any distribution model.
 - If the platform captures the whole meeting automatically, retain the raw file privately and trim the distributed replay so it ends at minute 50.
 - Distribute only the trimmed 0-50 teaching portion, per the established replay policy. The evergreen replay may be distributed through a registration-gated route; unrestricted public distribution is a later strategic choice, not a requirement.
 - Keep time-sensitive language out of the recorded teaching. Do not say tonight, this cohort, September 23, or before enrollment closes inside the core.
-

4. Privacy and participant audio

PARTICIPANT MICROPHONES ARE MUTED BY DEFAULT FOR MINUTES 0-50.

- No participant is invited to explain their situation verbally while recording.
- Participant-specific questions are held until minute 50. Say so once, early.
- Named chat responses are not read aloud into the evergreen recording.
- A highly personal chat question is never read verbatim. Summarise only the general methodological question, and only if that cannot expose the person.
- Participant scores, states, employers and circumstances stay private throughout.
- NO DIAGNOSTIC POLL INSIDE THE RECORDED ASSESSMENT. Nothing that asks anyone to reveal a score, a state, an employer, a circumstance or a decision. No show of hands, no room-level state distribution, no anonymous count of squares. The optional “What moved” interaction is in the appendix and is OUT of the timed core. One optional anonymous arrival poll is permitted, and it runs BEFORE the recording starts: see below.
- OPTIONAL ANONYMOUS ARRIVAL POLL, PRE-RECORDING ONLY. While the dated holding slide is up and the recording is OFF, one anonymous poll may ask “What brought you here?” with these options: my work feels static; I am considering an internal move; I am considering a career pivot; my role has changed around me; I want to know what would still count somewhere else. Close it before the recording starts. Do not read individual answers aloud and do not report a distribution into the recorded core. If the platform does not make it easy, skip it. Nothing depends on it.

EARLY DISCLOSURE, SLIDE 3: “The teaching portion is recorded so people can revisit the method. Your scores and your private workbook stay yours. The live Q&A at the end is not part of the evergreen replay.” Say it once, calmly. Do not expand it.

5. Q&A boundary, minutes 50-60

Q&A MAY clarify:

- Statement interpretation and the evidence protocol.
- Boundary and incomplete readings, and the sensitivity check.

- Move-category distinctions and what to investigate next.

Q&A MUST NOT:

- Become individual stay/leave coaching, or tell anyone to resign or stay.
- Predict layoffs or diagnose a named employer.
- Give legal, medical, financial, immigration, tax or mental-health advice.
- Ask for scores, states, confidence numbers or employer names.

If a question is really a request for a personal decision, name the boundary once and stop. If it asks whether experience will transfer to a named role, function, industry or employer, say plainly that this session did not read that destination: generic portability is not destination-specific portability. Do NOT sell the Career Move Review from the stage while its route is unverified, and do not mention the retired Private Capability Position Read at all.

6. Commercial architecture

Offer	Position
September 23 guided assessment	\$0. Free for this launch.
Career Evidence Starter	Free. The entry artifact. Not pitched from the stage.
Keep the Proof	\$49. For someone who has done the work but has no reliable record of it. A different problem from this session's, so it is NOT in the recorded continuation sequence. It belongs in follow-up, matched to that need.
Capability Formation Field Kit	Exactly \$150. Private, self-guided, repeatable. Not discounted, not bundled, never free. The only paid route named in the recorded sequence, and its price is spoken live rather than printed on the slide.
Career Move Review — ROUTE NOT VERIFIED	\$500, one public price, qualification before payment. The current advisory offer for someone with a named destination. NOT on the continuation slide and NOT sold from the stage until a verified individual route exists. Never route it to the enterprise Advisory page and never reuse a retired Private Read link.
Private Capability Position Read — RETIRED	Withdrawn. Not priced, not pitched, not booked, and it does not return under that name. Career Move Review replaces it.
Former paid group workshop	RETIRED from active public sale. May remain archived as an internal asset. Must NOT be presented as the current public next step.

- No fake scarcity, crossed-out prices, urgency language or “normally \$500” framing.
- No coupon, no attendee price, no bundle, no automatic credit between products.
- No fixed pricing appears on any recorded slide face or as a durable figure in speaker notes. Immediately before delivery, verify the current public price and purchase route. State or post only the verified current information live.
- The workbook contains no commercial offer of any kind.

7. Institutional delivery variant

For institutional delivery the sequence is: slide 22, the Next-Move Note, then hidden slide 31, the INSTITUTIONAL DELIVERY CLOSE, then slide 25, the evergreen close, then slide 26, Q&A. Slides 23 and 24 — the two commercial continuation slides — are skipped entirely.

Everything before slide 22 and everything from slide 25 onward is unchanged.

- No pricing, no Field Kit pitch, no Career Move Review pitch, no product CTA.
- Institutional delivery is NOT automatically free merely because the public flagship is free. Commercial arrangements are agreed separately and are not defined here.

8. Maven and Zoom configuration

Setting	Value
Maven format	Lightning Lesson
Listed duration	60 minutes
Listed time	6:00–7:00 PM CT, Wednesday, September 23, 2026
Price	Free
Registration	Open registration / no artificial marketing cap. Registration must remain within verified live-platform capacity, or an overflow or replay plan must be approved before promotion continues.
Zoom start	Open the room at 5:45 PM CT with the dated holding slide up, recording OFF.
Zoom end	7:00 PM CT hard stop.
Recording	Start on slide 1 at 6:00. Stop at 6:50.
Capacity — CHECK BEFORE PROMOTION	Zoom capacity is NOT unlimited and must not be described as such. Before promotion continues, record here the seat limit of the Zoom plan connected to this event and whatever Maven caps or requires, and verify both against registration. The family documents a 100-participant live capacity; no webinar licence and no larger capacity may be claimed until it exists.

9. Pre-session operations

- Confirm live platform capacity against registration.
- Deck downloaded locally: PRESENTER_VERSION_Stay_or_Leave_..._60MIN_v2.0.6_CANDIDATE.pptx. Confirm slides 27–33 are hidden.
- Workbook link ready: Capability_Position_Read_Workbook_60MIN_v2.0.1_CANDIDATE.pdf. Send with joining details and paste again in chat during minutes 0–2.
- Recording configured and tested; confirm where the file lands.
- Dated holding slide up from 5:45, recording OFF.
- Timer visible to the facilitator, set to count up from 0:00.
- Verify the current Field Kit route and price immediately before delivery. Confirm the Career Move Review is still absent from the participant-facing continuation sequence: it stays off until its fulfillment route is verified operational.

- Institutional variant decided in advance if this is an institutional delivery.
-

10. Rehearsal standard

TWO REHEARSALS ARE REQUIRED BEFORE THIS FAMILY LEAVES CANDIDATE.

Rehearsal 1 — timed content rehearsal

- Run the full recorded core start to finish, alone, at a calm delivery pace.
- PASS CONDITION: the evergreen close lands by 50:00 without rushing and without shortening the 19:00–31:00 rescore.
- Record the actual leave-time for every block in the reconciliation table.
- If it does not fit, cut from 45:00–48:00 first, then the buffer, then compress the four-states block. Never the rescore.

Rehearsal 2 — production rehearsal

- Screen sharing, including the hidden-slide behaviour in presenter view.
- Workbook cues: every page called at the right minute.
- Recording start on slide 1 and STOP — not pause — at 50:00, verified on screen before the first question. Rehearse the auto-record case: pause, then start on slide 1.
- The minute-50 Q&A transition, spoken aloud.
- The dated holding slide before recording begins, and getting off it cleanly.
- Chat paste of the workbook link.
- Backup internet and a backup device.

Workbook behaviour test — Adobe Acrobat Reader

- Open the workbook in Adobe Acrobat Reader, not a browser viewer.
- A bare “?” is refused in a corrected-score field.
- 3? is accepted. 2? and 5? are accepted.
- 6? is refused. 1?? is refused.
- All four totals calculate, and a question-marked score contributes its number without the mark.
- Every total can still be typed over by hand.

PROMOTION FROM CANDIDATE TO FINAL REQUIRES ALL THREE, IN ANY ORDER: (1) Rehearsal 1 passes; (2) Rehearsal 2 passes; (3) the workbook behaviour test passes in Adobe Acrobat Reader. Rehearsal 1 alone is NOT sufficient.

GATE STATUS. The workbook behaviour test was run by the owner in Adobe Acrobat Reader and PASSED on August 21, 2026, against the v2.0.1 workbook as it stands. That result belongs to this build of the file: regenerating the workbook voids it, because the form and its JavaScript are rebuilt with it. Rehearsal 1 and Rehearsal 2 remain OUTSTANDING, so the family remains CANDIDATE.

11. Source-of-truth map

- Deck:
PRESENTER_VERSION_Stay_or_Leave_Live_Career_Growth_Assessment_60MIN_v2.0.6_CANDIDATE.pptx — 33 slides, 26 active, 7 hidden.
 - Workbook: Capability_Position_Read_Workbook_60MIN_v2.0.1_CANDIDATE.pdf — 8 pages, 68 form fields.
 - Workbook source: Capability_Position_Read_Workbook_60MIN_v2.0.1_SOURCE.py.
 - Governing architecture, READ-ONLY:
Capability_Formation_Individual_Offer_Architecture_v1.1.docx.
 - This SOP:
Capability_Formation_Free_Flagship_SOP_Sept23_2026_60MIN_v2.0.9_CANDIDATE.docx.
 - Instrument source, unchanged and not edited: the v5.3.1 FINAL Intensive deck.
 - This SOP is standalone. It does not patch, and is not governed by, the paid-workshop Launch SOP family.
-

12. What is live elsewhere, and what remains unbuilt

Two categories. The first is live and outside this document's scope; the second does not exist yet. Changing anything in the first is a separate decision: this SOP points at those assets, it neither governs nor republishes them.

Live elsewhere — out of scope here, not unbuilt

- Maven event page and platform configuration for September 23, live at maven.com/p/8b3c40/stay-or-leave-live-career-growth-assessment.
- Attendee communications configured for the September 9 session, with its registration list maintained in Maven.
- Field Kit, reached through temidayoafonja.com/fieldkit, which is the deck face route, the QR target and the chat message. It is the evergreen destination because a recorded replay outlives any storefront URL.
- Current website copy. The live site is the source of truth for pricing.
- September 23 LinkedIn promotional sequence, already built in the current editorial publishing plan.

Genuinely unbuilt

- Career Move Review fulfillment route. The offer and price are decided; no route for it exists in the repository or on the live site, so it is off the continuation slide in deck v2.0.6 and out of Q&A until a verified individual route can be named here. The Private Capability Position Read is RETIRED.
- Post-session and replay email sequences; the replay landing page.
- School outreach materials, proposals and institutional pricing.
- Newsletter copy for the September 23 session.
