

THE DENSITY GROUP

KEEP THE PROOF

Printable & Fillable Tools

These pages hold the same fields as your Professional Record, for anyone who prefers to write by hand or type into a form. Fill them on screen, or print and complete them by hand. You do not need to complete both these pages and the Professional Record: choose whichever you will keep up.

*Permission first: your own recollection and what you are permitted to keep.
Never paste in employer-owned files or confidential detail.*

CAPTURE LOG

Quick Capture 1

Catch work the moment it happens, in two minutes, before the details soften. One capture per page.

What happened?

The event or piece of work, in a line.

Your specific contribution or judgment

Your part, not the team's.

What changed, improved, became possible, or was prevented

The consequence.

Who could confirm this, or what public source supports it

For a person, note their role and what they directly observed. Do not store private contact details. Any use of a public source stays subject to the permission rules.

Confidential detail to keep out

Name it, so you remember to leave it out.

Date (optional)

Trigger tag (optional)

e.g. project ended, scope changed, praise or feedback, risk prevented, decision under uncertainty, measurable result, responsibility expanded.

CAPTURE LOG

Quick Capture 2

Catch work the moment it happens, in two minutes, before the details soften. One capture per page.

What happened?

The event or piece of work, in a line.

Your specific contribution or judgment

Your part, not the team's.

What changed, improved, became possible, or was prevented

The consequence.

Who could confirm this, or what public source supports it

For a person, note their role and what they directly observed. Do not store private contact details. Any use of a public source stays subject to the permission rules.

Confidential detail to keep out

Name it, so you remember to leave it out.

Date (optional)

Trigger tag (optional)

e.g. project ended, scope changed, praise or feedback, risk prevented, decision under uncertainty, measurable result, responsibility expanded.

FULL ENTRIES

Full Entry, page 1 of 2

For work worth keeping in depth. Fill only the fields that apply.

Cluster A. When and what**Date or period**

Project or work event

Situation or need

The problem or condition you were responding to.

Why it mattered

What was at stake if it went unaddressed.

Cluster B. What was yours**Formal responsibility**

What you were assigned on paper.

Actual ownership

What you truly drove, which is often different.

Scope and constraint

Scale, complexity, or the limits you worked within.

People and functions involved

Who you worked with or influenced, by role.

Cluster C. The judgment inside it**Decision or judgment exercised**

The call you made, and the options you weighed.

Actions taken

What you did.

FULL ENTRIES

Full Entry, page 2 of 2

Cluster D. What changed, and what supports it**Outcome or observable change**

What was observably different afterward.

Problem prevented

The cost, delay, or risk that did not land. Use "would likely have," not "definitely would have."

Quantitative evidence, accurate and permitted

Numbers only when accurate and permitted. Never invented.

Qualitative evidence or validation

Feedback, recognition, or credible validation.

Team result versus your honest part

The shared outcome, and your honest share of it.

Cluster E. How you would say it, and who could confirm it**Internal wording, before translation**

Portable-language version

Who could corroborate this, by role, and what they directly observed

Role and observation only; no personal contact details.

Permitted evidence reference

Name the permitted source or location. Do not paste the artifact or confidential content.

Confidentiality and permission check

Confirm nothing restricted is being kept.

Retrieval tags

Review, promotion, compensation, resume, interview, biography, transition.

CORROBORATION LIST

Corroboration

Who could confirm your work while they still remember it. Corroboration readiness, not networking.

Corroboration 1

The work it refers to

A short label linking to the Full Entry.

Who could confirm it, by role

For example, "the operations manager I partnered with." Not a stored personal contact record.

What they directly observed

The specific thing this person saw or worked on with you.

Corroboration 2

The work it refers to

A short label linking to the Full Entry.

Who could confirm it, by role

For example, "the operations manager I partnered with." Not a stored personal contact record.

What they directly observed

The specific thing this person saw or worked on with you.

Corroboration 3

The work it refers to

A short label linking to the Full Entry.

Who could confirm it, by role

For example, "the operations manager I partnered with." Not a stored personal contact record.

What they directly observed

The specific thing this person saw or worked on with you.

*Keep this to role and observation. Do not store private contact details or personal information about the colleague inside your record.
This list prepares you to reach the right person with specifics later, through your own means, if a moment ever calls for it.*

TRANSLATION & PROOF LINE

Translation and Proof Line workspace

Turn internal language into portable language, and build the sentence you can reuse.

Translation worksheet

Work down the eight moves and apply the ones that fit, then the protection rule.

- ☐ Name to function.
- ☐ Assignment to contribution.
- ☐ Activity to consequence.
- ☐ Team to your part.
- ☐ Acronym to meaning.
- ☐ "Helped with" to real role.
- ☐ No number to credible detail.
- ☐ Number to scale.

Sensitive to permitted (protection rule): if the only accurate version would expose something you may not keep, omit it rather than reword it. Keep any team result separate from your own part throughout.

Proof Line builder

The condition

The problem or situation you were responding to.

Your part

The contribution, decision, or judgment that was yours.

The scope or constraint

The size or limits you worked within.

The outcome

What changed, or what was prevented.

The support

Permitted evidence or validation, when you have it.

Your Proof Line

A Proof Line does not need a number, must never contain an invented one, and never claims sole credit for a shared result.

MATCH TO A ROLE

Match Your Proof to a Role

Line up what a role asks for against the proof you already hold.

When a specific role is in front of you, this page lines up what the role asks for against the proof you already hold, and names the gaps in plain terms. Pick three requirements from one posting or review rubric. For each, find the Proof Line from your record that shows it, and name the gap you will name plainly rather than hide.

What the role asks for	My Proof Line that shows it	The gap I will name
EXAMPLE		
Owens onboarding end to end	Redesigned the onboarding flow for a 40-person team, cutting first-week setup from three days to one.	Have not yet run this at company-wide scale.

This page translates your evidence for a specific role. It does not advise on which roles to pursue. That is a different question, and a different tool.

MAINTENANCE

Optional maintenance checklists

Use whichever you will sustain, or both. Neither is required, and neither is better.

Monthly sweep, about ten to fifteen minutes

- ☐ Look back over the month's projects, decisions, feedback, changes, and problems you helped prevent.
- ☐ Add Quick Captures for anything worth keeping.
- ☐ Expand the single most significant item into a Full Entry.
- ☐ Run the confidentiality check: is everything here permitted?
- ☐ Tag each item for retrieval.

Quarterly review, about thirty minutes

- ☐ Read the quarter's entries in one sitting.
- ☐ Remove duplicates and anything too vague to be useful.
- ☐ Correct overstatement and add missing context while you still remember.
- ☐ Translate the strongest entries into Proof Lines.
- ☐ Note where evidence is thin, without drawing any conclusion about your career from the gap.
- ☐ Update your index.

This is housekeeping, not a verdict. It organizes and translates what happened; it does not tell you what your career means.
